c. Grab photos / images like this:

i. Type in your **search keyword in your browser** for the image you'd want downloaded for example use: "great oil paintings" or "paintings of Rembrandt" as your search keyword then click on "Images" just below your search bar

- ii. Click on an image you'd want and wait for it to load
- iii. Once finished loading "right click" on the image and click on "Save Image As"

- 4. Go back to your "Movie Maker" program and click on "Add videos & photos"
 - a. You can add videos and photos using this command
 - b. Tip: you can choose **multiple files** by simply holding the "Control" key

c. Click on "Open" when you have selected the files you wanted to add

5. Add audio to your movie by clicking "Add Music" then again click on "Add Music"

6. A green bar just below your images / video would represent the audio file that you just inserteda. Press the "Spacebar" key from your keyboard to start playing the movie with music

- 7. Once finished click on the upper left corner of the screen
 - a. Click on "Save Movie" then pick "For Computer"

b. Pick the folder in which you'd want it saved to

Note:

There are a bunch of other options available to you in this program which you could utilize to make your movie appealing to you or your viewers. You could find these out on "Animations" and "Visual Effects"

Important:

Always make sure that you have permission to use the images / videos / audios that you grabbed from the Internet and if you don't have permission in using the files that you acquired from the Internet use your video for your own personal use only
